With the increased urbanization trend, necessity of agro ecotourism was felt to be vital sector need to be developed in tourism sector. Moreover, 79.85% of Nepali citizen are still rural residents shows large scope of agro ecotourism at village level. Every organizations that may be governmental organizations, private companies, agencies, Non-governmental organizations, International government organizations, donor agencies etc. became active to involve in this sector and generate huge revenue from it. ### **Conclusion:**

There are already lots of organizations working in agro-ecotourism sector in Nepal. Still we are unable to develop tourism sector in exponential progression. Many limiting factors like political instability, COVID-19 Pandemic, natural disasters, etc. are still prevalent which need to be addressed as soon as possible for the development of sustainable agro ecotourism in Nepal.
